

THOMAS FREY

ineee Full-Stack Software Engineer
Profile

Kirsch-lès-Sierck, France (57480) • +33 6 48 51 64 17

tommy.frey.2006@gmail.com • [LinkedIn](#)

Analytical Computer Science Professional with nearly 1 year of hands-on Web and Software Development Experience Spanning Full-Stack Applications, Backend Services, Database Engineering, and Technical Automation.

Practical experience in full-stack software development, including reusable user interfaces, backend API architecture, database management, authentication and access control, deployment, and application maintenance. Experienced in collaborative professional development environments, with exposure to CI/CD, testing, software quality, and secure development practices. Adaptable and quick to learn, with strong problem-solving skills and the ability to contribute across full-stack, backend, DevOps, database, and software development projects.

AREAS OF EXPERTISE

- Backend Web Development
- Front-End UI Development
- Database Engineering
- SQL Development
- Authentication & Authorisation
- Role-Based Access Control
- Requirements Analyses
- Application Security
- Multilingual Content Management
- Cross-functional Collaboration
- Technical Troubleshooting
- Application Maintenance

EDUCATION

BUT (Bachelor Universitaire de Technologie), Computer Science – Université de Lorraine, Metz, France (**In Progress | 2027**)

Baccalauréat Général, Mention Assez Bien – Lycée Charlemagne (**2023**)

Specialties: Mathematics, Physics-Chemistry, Computer Science (NSI); Euro English Section

TECHNICAL SKILLS

Software Design:

Languages:

Other Tools:

Frameworks / UI:

DevOps / Deployment:

Quality & Dependency Tools:

Security:

Version Control:

Databases:

Systems:

REST API architecture

Java, TypeScript / JavaScript, PHP, HTML, CSS — basic notions of Python and C

Maven, Postman, VS Code, IntelliJ, Jira, Confluence

Angular, PrimeNG, Spring Boot, Tailwind CSS

Docker, Nginx, basic exposure to CI/CD

SonarQube, Dependency-Track

Spring Security, JWT, OTP / 2FA

Git, GitHub, GitLab, GitKraken

PostgreSQL, MySQL, PL/SQL

Linux, Windows

INTERNSHIP EXPERIENCE

WORLDLINE FINANCIAL SERVICES – Bertrange, Luxembourg

Web Developer Intern

Apr 2026 – Aug 2026

- Modernised MULTILINE, Worldline's corporate online-payment platform supporting secure, automated payments for Raiffeisen, BGL BNP Paribas, Société Générale, Banque Internationale à Luxembourg, ING, Post Luxembourg, Banque et Caisse d'Épargne de l'État, and Banque de Luxembourg.
- Redeveloped the front end with Angular and PrimeNG and built Java Spring Boot REST APIs integrated with PostgreSQL, with the application currently in pre-production and undergoing internal testing ahead of rollout.
- Collaborated within a 6-person team, working with a senior developer on technical decisions and the team maintaining the previous MULTILINE site to gather requirements, then presented the completed application to internal management.

Web Developer Intern

Jun 2025 – Aug 2025

- Architected reusable, editable UI components enabling business teams to update content without full redeployment, alongside multilingual content management, role-based permissions, and JWT/OTP two-factor authentication.

Web Developer (Seasonal)

Oct 2025 | Dec 2025 – Jan 2026

- Developed a full-stack task-management web application for the Operating team, covering database design, dynamic front-end functionality, back-end logic, daily scheduling, and task-frequency management; returned for short on-call periods to continue web development work.

- Resolved customer questions, issues, and complaints through phone, e-mail, and chat support.

LANGUAGES: French, English: Native | German: B2 (Upper-Intermediate) | Dutch: A1 (Elementary)
